	<b>ACC-STK RS Front</b> TCM Complete Parking System w/ Front & Rear Sensors		

Preco's commercial radars detect stationary and moving objects directly behind the vehicle and alerts the driver in the cabin with both sound and lights, getting progressively louder as the object gets closer. The small display unit is easily mounted in the cab while the sensor can be bolted to the vehicle body, hung on a bracket or mounted out of sight behind any non-metallic surface.

Brigade's 360° camera monitor system offers the ultimate view of a vehicle for the first time. Using brand new technology it utilises ultra wide-angle cameras mounted on the front, sides and rear of the vehicle to capture the surrounding areas of the vehicle including all blind spots, resulting in a 360° bird's-eye view.
